

Product List

SYNTHRON

ADDITIVES FOR POWDER COATINGS

YOUR ADVANCED SOLUTIONS PARTNER

PRODUCT LIST FOR POWDER COATINGS CATALYSTS & HARDENERS

Actiron® 32-18 A	Texture catalyst for wrinkle finishes. Used in combination with Powderlink 1174
Actiron® 2 MI 20 P	2- Methyl imidazole. High reactivity catalyst & hardener for epoxy, PU & hybrids
Actiron® CC 6	Choline chloride. Good latency catalyst for PU & acrylics
Actiron® DBT	Dibutyl tin laurate. PU catalyst on silica carrier
Actiron® TAB P	Brominated compound. High density crosslinking at low temperatures Non-yellowing, non-hazardous. Recommended for epoxy, hybrids & PU
Actiron® NX3 P	Amino phenolic derivative. Low yellowing, high reactivity & FDA 175.300
Actiron® NXJ 60 P	2 propyl imidazole. Improved latency compared to Actiron 2 MI 20 P
Actiron® DMSA 18	Tertiary amine. Good latency. Can improve corrosion resistance Provides excellent levelling & gloss
Actiron® 32057	Tertiary amine. Low yellowing. Good compromise between reactivity and latency
Actiron® NX 91 P	Tertiary amine. Latent catalyst for epoxy, hybrid & PU systems

PRODUCT LIST FOR POWDER COATINGS ADDITIVES

LEVELLING AGENTS

Modarez® 370 P	Most compatible levelling agent. High molecular weight
Modarez® MFP C P	Excellent levelling & gloss in difficult systems. Low molecular weight
Modarez® 369 P	Superior levelling in all systems. Average molecular weight

DEGASSING AGENTS

Modarez® SI 29-079 B	Non yellowing degassing agent
-----------------------------	-------------------------------

TRIBO ADDITIVES

Modarez® TA 483	Amine based additive to improve electrical charge in tribo applications
------------------------	---

ODOUR MASKING

Masquodor® TF P	Covers unpleasant odours during application e.g. UV powder
------------------------	--
